Movies API 1.0.0

/apispec_1.json

API for fetching movie data from TMDB API.

Authorize

Movies

GET

/movies

Get a list of random movies

get_movies

Parameters

Try it out

Name	Description
n * required	
integer	Number of random movies to list (1-20)
(query)	
n - Number of random movies to list (1-20)	

Responses

Response content type

application/json

Code	Description
200	A list of random movies
Example Value Model <pre>[{ "adult": false, "backdrop_path": "/1Gf5Ydh1J1G7Tf7WkSRrs6ssZ3G.jpg", "genre_ids": [99] }]</pre>	

Code	Description
	<pre>], "id": 24593, "original_language": "en", "original_title": "Thinking XXX", "overview": "For a book project, photographer Timothy Greenfield-Sanders took photographs of 30 stars of adult movies...", "popularity": 3.8453, "poster_path": "/kqB0fF7Vl0Dmw1exH4iDZHGUiVI.jpg", "release_date": "2004-10-27", "title": "Thinking XXX", "video": false, "vote_average": 5.5, "vote_count": 99 }, { "adult": false, "backdrop_path": "/lUPz9zW0uf0bHfYsRRID8RtBHEU.jpg", "genre_ids": [18, 36], </pre>
400	Invalid parameter value Example Value Model <pre>{ "error": "Not Found", "message": "The requested resource was not found" }</pre>
401	Unauthorized - Invalid or missing API key Example Value Model <pre>{ "error": "Not Found", "message": "The requested resource was not found" }</pre>
500	Internal server error when fetching movies Example Value Model <pre>{ "error": "Not Found", "message": "The requested resource was not found" }</pre>

POST

/movies
/compare

Generate a comparison chart for movies based on
their scores

post_movies_com
pare

🔒

Parameters

Try it out

Code	Description
500	<pre>{ "error": "string", "message": "string", "not_found_ids": [0]}</pre> Internal server error Example Value Model <pre>{ "error": "Not Found", "message": "The requested resource was not found"}</pre>

GET

/movies/favorites

Get a list of all favorite movies

get_movies_favorites

Parameters

Try it out

No parameters

Responses

Response content type

application/json

Code

Description

200

List of favorite movies

Example Value

Model

```
[  {    "adult": false,    "backdrop_path": "/1Gf5Ydh1J1G7Tf7WkSRrs6ssZ3G.jpg",    "genre_ids": [      99    ],    "id": 24593,    "original_language": "en",    "original_title": "Thinking XXX",    "overview": "For a book project, photographer Timothy Greenfield-Sanders took photographs of 30 stars of adult movies...",    "popularity": 3.8453,    "poster_path": "/kqB0fF7Vl0Dmw1exH4iDZHGUiVI.jpg",    "release_date": "2004-10-27",    "title": "Thinking XXX",    "video": false,    "vote_average": 5.5,    "vote_count": 99  }]
```

Code	Description
401	Unauthorized - Invalid or missing API key
	Example ValueModel <pre>{ "error": "Not Found", "message": "The requested resource was not found"}</pre>
404	No favorites found
	Example ValueModel <pre>{ "error": "Not Found", "message": "The requested resource was not found"}</pre>
500	Internal server error
	Example ValueModel <pre>{ "error": "Not Found", "message": "The requested resource was not found"}</pre>

DELETE

/movies/favorites/{movie_id}

Remove a movie from favorites

delete_movies_favorites__movie_id_

Parameters

Try it out

Name	Description
movie_id * required integer (path)	The movie ID to remove from favorites

movie_id - The movie ID to remove from favo

Responses

Response content type

application/json

Code	Description
200	Movie removed from favorites

Code

Description

Example Value Model
